PRESS RELEASE
May 19, 2020 @ 2:00 p.m.

Phased Reopening of Businesses:

Each business and industry must have a plan to protect employees and consumers, make the physical work space safer and implement processes that lower risk of infection in the business. In developing these plans, businesses will need to consider three main factors.

The first factor is protections for employees and customers. These include possible adjustments to workplace hours and shift design as necessary to reduce density in the workplace; enacting social distancing protocols, and restricting non-essential travel for employees.

The second is changes to the physical workspace, including requiring all employees and customers to wear masks if in frequent close contact with others and implementing strict cleaning and sanitation standards.

The last factor for businesses to consider is implementing processes that meet the changing public health obligations, like screening individuals when they enter the workplace, or reporting confirmed positives to customers...
